

NEW
PRO-SIS SA
It's here at last!

F.E.R. is a member of FIRM

● The **engine technical database** you have been waiting for!

Why subscribe to the PRO-SIS SA technical database:

- PROSIS-SA - Professional Shop Information System for all engine remanufacturers and remanufacturing / reconditioning workshops
- The technical database that everyone has been waiting for!
- Access to a vast resource of engine data including engine blue prints
- Over 6,000 engines (automotive; industrial; heavy duty; motorcycle; marine, sport etc.)
- All data is technical - no parts catalogues involved
- Online, new data updates regularly available – no need to reload whole database
- Add your own data
- Available in eight languages by annual subscription (Danish; Dutch; English; French; German; Italian; Spanish; Swedish)
- Exclusively available by subscription to professional engine remanufacturers and remanufacturing / reconditioning workshops who are members of their national associations that belong to FIRM or the WERC.
- Technical data has been pooled from the USA, Australasia, Africa and Europe
- A full range of search options – engine number; casting number; rod housing bore; engine bore size
- A further huge amount of print and electronic data is available in records and archives
- The record and archive information will be available via telephone, fax or e-mail from three experienced AERA engine technicians
- The technician helpline is available during Tech Hotline hours and there is no limit to the number of times it can be contacted. The Tech Hotline hours are USA CST.
- Technical enquiries should be responded to within 30 minutes of arrival to AERA headquarters during normal business hours
- Very competitively priced annual subscription

This is a joint venture between the Engine Remanufacturing associations in the USA (AERA) Europe (FIRM), Australasia (NZERA / ERA) and South Africa using AERA's PROSIS system as the base platform. The new system has the full backing of all parties and has the resources to continually provide new information

Nothing like this has ever been done before! The system is about providing engine remanufacturers/rebuilders with technical data and information as this is what the members of all the associations have asked for.

Contact Brian at the FER office (Tel: 01752 863681 or e-mail ferm@btinternet.com) for further information and price
